

# Alice Chen

Senior Backend Engineer

8 Years Microservices Architecture · Cloud Native Expert

Shanghai, China · +86

13800138000 · [alice.chen@example.com](mailto:alice.chen@example.com) · [github.com/alicechenxxxxxxx](https://github.com/alicechenxxxxxxx)

## Core Strengths

### Microservices Architecture

Led enterprise microservices architecture design and implementation, supporting **10M+ daily requests**

### High-Concurrency Systems

Built distributed task scheduling framework, achieved **5000+ GitHub Stars** from open source community

### Cloud Native Migration

Completed smooth migration from monolithic to cloud-native architecture, deployment efficiency improved **10×**

# Open Source Contributions

Certifications: CKA · AWS SAA · GCP Professional Cloud Architect

## Key Achievements

### API Latency Optimization

P99 from 800ms to 50ms (16× improvement)

### Containerization Efficiency

From weekly to daily releases

### System Availability

99.99% SLA achieved

### Cost Optimization

Cloud resource cost reduced by 40%

### Technical Influence

30+ internal tech talks delivered

## Open Source & Patents

OPEN SOURCE PROJECT

### CloudFlow - Distributed Task Scheduling Framework

GitHub 5000+ Stars

TECHNICAL PATENT

### Stream-based Resource Scheduling Method

CN202310XXXXXX

# Tech Stack

## CLOUD PLATFORMS

AWS, GCP, Alibaba Cloud, Kubernetes, Docker

## BACKEND DEVELOPMENT

Go, Java, Python, Rust, Node.js

## MICROSERVICES

gRPC, GraphQL, REST API, EventMesh, Nacos

## DATA STORAGE

PostgreSQL, MySQL, Redis, MongoDB, Elasticsearch

## MESSAGE QUEUES

Kafka, RabbitMQ, Pulsar, NATS

## OBSERVABILITY

Prometheus, Grafana, Jaeger, ELK Stack, Datadog

## CI/CD

GitLab CI, ArgoCD, Flux, Jenkins, GitHub Actions

## FRAMEWORKS

Spring Boot, FastAPI, Gin, Django, Echo

# Personal Projects

# ResumeForge - Brand-Grade Resume Generator

Open Source Project | Jan 2025 – Present

- Built multi-theme resume generation system from scratch with **58 brand design styles** (Apple/Tesla/Stripe/Vercel etc.)
- YAML-driven content management, one-click generation of **HTML/PDF/DOCX** formats, bilingual support
- Modular architecture: content-style separation, hot-pluggable themes, extensible brand customization
- Tech stack: Python, Jinja2 templating, python-docx, Chrome Headless PDF rendering

## Work Experience

### StarTech Group

Jun 2022 – Present | Shanghai

#### Technical Architect · Backend Team Lead

Led core business system architecture evolution, managing **12-person team** through cloud-native transformation, supporting **3× business growth**.

#### Cloud Native Architecture Transformation

- Decomposed monolithic application into **30+ microservices** with Service Mesh architecture
- Established GitOps release process, achieved **daily iteration** capability
- System availability improved from 99.5% to **99.99%**, recovery time from hours to minutes

#### High-Concurrency Trading System

- Designed distributed transaction solution, supporting **10M+ daily orders**
- API P99 latency optimized from 800ms to **50ms**, peak QPS reached **50,000**
- Introduced async event-driven architecture, throughput improved **5×**

#### Data Platform Construction

- Built real-time data pipeline supporting **PB-scale** data processing
- Introduced ClickHouse columnar storage, query performance improved **100×**
- Established data quality monitoring system, accuracy reached **99.9%**

## CloudSpark AI Tech

Mar 2019 – May 2022 | Shenzhen

### Senior Backend Engineer

Participated in AI inference platform R&D, responsible for core service design and performance optimization.

#### AI Inference Service Platform

- Designed model service gateway supporting **100+ AI models** dynamic scheduling
- Implemented inference request load balancing, GPU utilization improved from 40% to **85%**
- Established model version management and canary release mechanism

#### Real-time Feature Computation System

- Built streaming feature computation engine, latency reduced from seconds to **milliseconds**
- Feature storage using Redis Cluster, supporting **billion-scale** real-time queries
- System supported **10M+ DAU** personalized recommendations

## InnovSoft Technology

Jul 2017 – Feb 2019 | Beijing

### Backend Developer

#### E-commerce Platform Backend Services

- Developed order and payment core modules, supporting **1M+ daily orders**
- Designed distributed lock solution, resolved inventory overselling issue
- Introduced message queue decoupling, system stability improved **30%**

## Certifications

**CKA** Aug 2023

**AWS Solutions Architect** Nov 2022

**GCP Professional Cloud Architect** Jun 2022

**Alibaba Cloud ACE** Sep 2021

**PMP** Mar 2020

# Education

2013 – 2017

**Shanghai Jiao Tong University**

Top-tier University

Bachelor of Computer Science
